WEIGHT

MAX. OPERATING TEMPERATURE

Rich elegant graphics, color **10.1"** HMI wide screen for enhanced user interface.

16.2 million-colors, 1024*600 resolution,119 pixels/inch clarity.

WiFi/IoT enabled for remote monitoring, daily report management and in-depth SPC analysis

Visually appealing real-time presentation of machine parameters like cycle times, digital inputs & outputs, flow, pressure, zone temperature, scale reading, hourly production & energy consumption.

x32, x40 or x64 Outputs interface capability.

Super ease to use MMI interface

Programmable on-field digital & proportional outputs for each machine execution stage.

USB port for remote reprogramming, data transfer, machine calibration etc.

Built-in Interface for Pressure Transducer, Blowers, Encoder & Energy meter.

Optional SD card storage facility for last 10-year machine shots data, set data changes & errors

HMI with **5.7"** TFT 16 million colors, **640*480** resolution, 142 pixels/inch clarity.

Dual-processor hardware system based on ARM® & PIC® technology.

Seamless integration with all servo drives, variable volume pumps & proportional valves.

Suitable for Standard type, Double color, 2-station Slider, Insert/Rubber molding machines.

x32 or x40 Outputs interface capability based on machine demands.

Programmable on-field digital & proportional outputs for each machine execution stage.

USB port for remote reprogramming, data transfer, machine calibration etc.

Built-in Interface for Pressure Transducer, Blowers, Encoder & Energy meter.

Integrated control for Auto Tonnage feature control based on Pulse /Time & handling pick & place robot.

Special functions include: 2 Cores with priority, Intrugen, Thin-wall injection, Adaptive moldlocking correction, Mold-opening correction, Online power calculations Hourly/Job/Daily/Shift/Last 10 shots.

Optional SD card storage facility for last 10-year machine shots data, set data changes & errors.

For Blow Molding Machine

7.0"TFT with resistive touch screen for intuitive interface.

16.2 million-colors, 800*480 pixel resolution,128 pixels/inch clarity

HAND mode touch buttons with LED indication for safe,

Suitable for Single & Double Station type with parison

Quickest & reliable blow sequence execution control system in market.

Mold & Carriage position control based on linear potentiometers or regular timers.

In-built ready to use flow & pressure proportional control.

x32, x40 Outputs interface capability based on machine
